

Billiard Hall

Sport and luxury perfectly combined

The construction of this billiard hall was a very special and exciting challenge. With our longstanding Builder Partner Karschunke Systembau, the sports hall was built in Wolfsburg, Germany. The building complex consists of two parts. In addition to the billiard hall, there is a gastronomic area which satisfies even the highest demands.

The billiard hall has a total area of over 2,000 m² and a height of 6 metres. Thanks to the modern sound insulation, the two functional areas, gastronomy and sport, form a perfect symbiosis. Through the window in the dividing wall, the bar and restaurant visitors can comfortably follow the game. The exterior facade has panels in various colours with bright highlights and has a large glass front.

Builder	Karschunke Systembau - Germany
Building Usage	Leisure / Bowling
Surface	2,110 m ²
Span	43 m
Frame Type	AZM2
Wall System	Individual
Roof System	LPR1000
