

## Champagne Storage Facility

### High quality building for premium product

Astron was involved in the construction of the warehouse for food storage, which is located in the wine-growing region Champagne in France. Just a few years ago, the couple Lecomtes decided to buy a piece of land for the production of champagne. Today they possess more than 7,000 m<sup>2</sup> of land and produce 70,000 bottles of champagne a year.

Our Builder Partner C.I.R. realized two buildings at the vineyard. One of the storage facilities has a size of 800 m<sup>2</sup> and the second one, which was built a bit later, has 600 m<sup>2</sup>. The facility was created for storing grape products. Adjacent to this, is a production hall where the Lecomtes have the latest wine-making equipment. In a separate showroom, the fine wines are being demonstrated and tasted.

Builder	C.I.R. - France
Building Usage	Agriculture
Surface	600 m <sup>2</sup>
Span	30 m
Frame Type	AZM2
Wall System	LPA900
Roof System	LPR1000
