

 Bottling Plant

Building that contributes to business success

In the Ukraine, there is a modern, well-planned bottling plant from Astron. The customer is the leading Ukrainian producer of wine. Covering an area of 3,850 m², the new hall safeguards both the storage and production of the wine, and provides ample space for offices.

Challenging for the design was, on the one hand, the relatively short timeframe and, on the other hand, the layout of the equipment. The modern and powerful production technologies, such as the continuous casting line from Italy, were successfully installed. The entire bottling plant complex is divided into three parts, whereby the offices are housed on the upper floor. The warehouse for raw materials is on the right. Underneath and to the left of the offices is the production facility.

The newly erected bottling plant fulfills all the requirements of the customer. Astron and its Builder Partners were able to adhere to the prescribed time-frame and budget planning. Thanks to the new, well-designed and modern building, the wine company can expand its production capacity and strengthen its position on the market.

Builder	Nikolaevpromstroy-Montazh - Ukraine
Building Usage	Industry
Surface	6,000 m ²
Span	54 m
Frame Type	AZM3
Wall System	Individual
Roof System	LPR1000
