

Brewery Industry Hall

Satisfied customers are repeat customers

When it comes to buildings and production facilities, the German brewery Oettinger has relied on Astron for many years. Astron has already completed five projects for Oettinger with a total of 40,000 m². Crucial for the decision to build with Astron again, were the high-quality materials, the low cost and the short construction phases of the brewery industry hall projects to date in Oettingen, Gotha, Schwerin, Mönchengladbach and Brunswick.

The latest project, which was realized by Astron in cooperation with reliable Builder Partners, is a brewery industry hall with a floor area of 8,500 m². The erected halls have room for an extensive warehouse and a spacious brewery and are designed in Oettinger's corporate colours. Once again, the customer

is very pleased with the high quality of the buildings and the fact that Astron reliably kept all the deadlines.
