

## Food Production and Warehouse Hall

### Design and effectivity go hand in hand

The long-time Astron Builder Partner Thema di Domenico Pezzola has built a food production and warehouse hall in Italy that is perfectly adapted to the needs of the client. Several buildings with a total of 2,300 m<sup>2</sup> were built here within a short construction period. The main building, with an area of 1,200 m<sup>2</sup>, is complemented by several annexes and canopies with various heights. In the design, Thema di Domenico Pezzola was able to successfully combine a mixture of local construction traditions and the advantages of modern Astron steel halls.

In a food production and warehouse hall, perfect insulation is extremely important. For example, the cold storage rooms for fruit and vegetables need to be perfectly insulated in order to keep

the cost of the refrigeration equipment as low as possible. No problem for our experienced Builder Partner! The customer, Fortyfruit, is very pleased with the successful implementation of his wishes.

Builder	Thema di Domenico Pezzola - Italy
Building Usage	Food Industry
Surface	2,300 m <sup>2</sup>
Span	41 m
Frame Type	AZM1
Wall System	LPA900
Roof System	Individual
