

## Industrial Building of Printing Company

### Provides creative space for Printing Company

The building is located in France, near Paris. The customer, Espace Graphic, is a graphics company that specializes in producing very high quality prints. As the old facility for the employees and the machines had become too small, they needed new premises. The on-site Builder Partner was A2P INGENIERIE, a very competent Astron partner.

In order to create adequate space for the printing machines and the modern equipment, the production hall has an area of 780 m<sup>2</sup> without annoying intermediate columns. This provides more flexibility for the machines arrangement and fosters a creative working atmosphere. The adjoining office complex of the printing plant has 265 m<sup>2</sup> of office space. The special feature of this industrial building is its unusual and very chic

design. The outer wall is made of black Sinutec panels combined with a warm wood look, and this combination gives visitors an impressive welcome.
