

## Industrial Hall of Metal Manufacturer

### Strong and sturdy for heavy loads

This large production hall in Poland was erected with the help of our Builder PW M. Pasek Sp. J. for Arcelor Construction Poland, world leader in steel. An industrial project in Bytom was completed for this giant in the field of metal structures already back in 2004. Further joint projects are planned.

The challenge in the construction of the building was the enormous weight that has to be borne for the production of sandwich panels with metal content. For this reason, the industrial hall is equipped with three crane beams and six cranes that can carry a total of up to 80 tons of load. The entire building has the incredible size of 139 metres length and 22 metres width.

Builder	PW M. Pasek Sp. j. - Poland
Building Usage	Industry
Surface	5,800 m <sup>2</sup>
Span	22 m
Frame Type	Individual
Wall System	Individual
Roof System	Individual
