

Industrial Steel Building

Sustainable hall for the cosmetics industry

The contract for the industrial steel building just outside Moscow came from the cosmetics giant Oriflame, Sweden. The demand for cosmetics and the number of enthusiastic customers is enormous. For years, the company has been experiencing increasing growth, especially on the Russian market.

This steel building was erected in order to meet the purchasing power of cosmetics fans. It serves as a production hall and distribution centre for the Russian market. The complex is divided into two parts according to the various functions. The total area amounts to 56,000 m². Ventilation is provided by a modern fan system that uses natural resources. The issue of sustainability was a top priority for our customers. For this, the standards of LEED certification

were complied with. In the construction sector, this stands for being sustainable, environmentally friendly and resource-efficient.

Builder	Noginsk - Russia
Building Usage	Industry
Surface	56,000 m ²
Span	96 m
Frame Type	AZM3
Wall System	Individual
Roof System	LMR600
