

Steel Construction of Laundry Facility

With high-efficient design

Astron specializes in individual building solutions for every application. No matter if food storage, crane building or laundry. We will find the solution that fits your needs best! This steel construction of laundry was successfully completed by Astron and Builder Johann Bott.

The construction company is now in its seventh generation. It is characterised by its reliability and innovation. The company has been officially recognised for its foresight and innovation.

The laundry is located in Bad Kreuznach near Frankfurt and specializes in the supply, laundry and care of textiles. This includes industrial protective clothing, hotel linen and workwear.

The laundry is one of the most modern and best-equipped washing facilities in

all Germany. In a space of over 2,000 m², state-of-the-art machines support the professional laundry and textile care.

The exterior of the steel construction is fitted with light gray panelling with blue design details. The front part of the laundry hall has a generous number of windows.
