

Plastic Manufacturing Plant

Spacious and functional

This hall for plastic production was built in Germany. The customer, Akro-Plastic GmbH, is a leading company in the development, production and distribution of components of different types and materials.

The new building complex covers an extensive area with several buildings that have been erected side by side, each with its specific function. The total ground surface is nearly 6,000 m². The plastic manufacturing plant was constructed without intermediate columns. Additionally, it has been equipped for the transportation of heavy materials with a crane beam that can transport several tons of weight. Apart from the production hall, the building complex also includes a multi-storey office building for the staff and the administrative

services of the company. The plastic manufacturing plant provides a solution for production and administration.

Builder	Wilhelm Bouhs - Germany
