

## Prefabricated Halls for Timber Production

### 98,000 m<sup>2</sup> area built in 10 weeks

This prefabricated hall complex was built for the timber giant Kronostar in Russia. The complex has the incredible total area of 98,000 m<sup>2</sup> and it is used for timber production. Kronostar is the market leader in manufacturing and distributing medium density fibreboard.

Using the prefabricated halls, the huge indoor complex was built in just 10 weeks. All previous experience was incorporated in the design for this latest timber production plant. Thanks to the efficient hall concept, 60 million m<sup>2</sup> of laminate can be produced annually. The focus of the construction project was not only the timber production, a responsible approach to the environment and to natural resources was also given particular attention.

Builder	Kronostar - Russia
Building Usage	Industry
Surface	98,000 m <sup>2</sup>
Span	72 m
Frame Type	AZM1
Wall System	LPA900
Roof System	Polar roof
