

## Adjoining Office Building

### Warehouse and office combined

In order to be able to work and store products in a modern building complex in the future, the company Elektrotek decided to go for an adjoining office building. The steel hall houses both warehouse and the multi-storey office area of the company. Elektrotek is one of the leading companies in the energy sector. It develops utility and energy systems for customers in industrial and commercial fields, for governmental institutions as well as research centres. The office building was completed with Builder Partner Artim-Serwis.

The three-storey office complex comprises a total area of 1,700 m<sup>2</sup>. More than 100 employees work here. The warehouse has an area of 1,400 m<sup>2</sup>. The adjoining office building has a contemporary architectural style. The facade

is decorated in various shades of grey and has several glass elements which ensure that the modern office rooms are supplied with daylight. The office building was completed in just five months and fully met the expectations of the client.
