

Exhibition Hall

An artistic building

With the help of the experienced Astron Builder Partner Wilhelm Bouhs Bau GmbH, a 630 m² exhibition hall was constructed for Galerie Rackey in Bad Honnef. The building had to meet the high demands of a gallery dealing with the important art works of the 20th and 21st centuries. Using an Astron hall, a new exhibition building was erected for the gallery that was originally founded in 1985. The hall is located in the middle of a business park so that appropriate storage and presentation of the works of art can be ensured.

The construction of this modern exhibition hall with ridge skylights and solid walls completely satisfied the customer. The building is home not only to works of art, but with its red exterior wall paint has become a piece of art in itself.
