

Success across the board

The furniture store 1001 Sommer near Hamburg was the customer for this hall. The company needed spacious sales and exhibition areas for its high-quality terrace and conservatory furniture. The products are characterized by their high quality, weather resistance and durability. With the help of Beecken, a family-run Astron Builder Partner, the hall was swiftly constructed.

Since 2014, the products have been displayed and sold in the new furniture store on two levels in an area of 2,000 m². Thanks to the largely column-free interior, the natural light incidence and the pleasant atmosphere of the hall, the furniture store project is a complete success.

Our flexible building system offers countless design possibilities for a wide

range of building applications: Retail outlets and shops, production halls and many more...
