

Retail Business

Making the most of natural light

The steel hall in Winsen near Hamburg serves as a retail store for our customer. Due to a steady growth in business, the company REBO, leading distributor of motor equipment and motorized lawn-mowers, needed a new, spacious retail store. The Builder for this project was Hansen Hallenbau Schwarzenbek.

The retail store covers a total area of 1,200 m². The hall is in a discreet, professional gray both on the roof and on the outer walls. Translucent inserts have been incorporated into the side walls and the roof in order to utilize natural resources in the best possible way and to ensure that there is a pleasant atmosphere in the steel hall. It includes a sales area and a showroom for motor equipment, a warehouse and an area for the employees.
