

## Seed storage

This bulk cargo hall in the Ukraine was completed by our longstanding local Builder Partner Sakti Plus. The steel structure was designed for Maisadour Semences SA. It is the fourth building to be designed for the French company. Two already exist in France and one in Spain. The bulk cargo hall was built to promote the agricultural development in Eastern Europe. The company's local branch was able to create 100 permanent and 200 seasonal jobs.

The complex covers the huge area of 9,000 m<sup>2</sup>, divided into several building areas. The length of the hall extends over 123 metres, with a width of up to 40 metres. The interior of the bulk cargo hall does not have any disturbing intermediate columns. Skylights integrated into the roof provide a pleasant interior

atmosphere. The hall is designed in an attractive green with white details.

Builder	Sakti Plus - Ukraine
Building Usage	Industry / Agriculture
Surface	9,000 m <sup>2</sup>
Span	40 m
Frame Type	AZM2
Wall System	LPA900
Roof System	LPR1000
