

★ Hotel

Where guests feel at home

That steel buildings do not have to make a cold impression has been proven by Astron in Mailand. Here in the heart of the business area of the town, Astron, together with the Italian Builder Partner Teorema, has built a multi-storey hotel with 240 rooms, a spacious restaurant, a fitness area and conference rooms with an area of over 450 m².

The architecture and design play an especially critical role for a hotel. In the case of Doubletree Hotel that belongs to the Hilton Chain, the client requested that the building should reflect the style of a hotel in all its areas. The architects at Astron were able to do an excellent job and fulfill all expectations. Warm colours on the facade and in the interior of the hotel ensure that guests feel at home here from the moment they arrive.
